The EZ Connect™ N Draft 11n Wireless USB2.0 Adapter (SMCWUSBS-N) enables Wireless-N connectivity to your desktop or notebook computer and provides improved throughput and range than existing 802.11g technology. Upgrading to Wireless-N is an excellent solution for browsing the Internet and sharing files such as video, music and photos. The SMCWUSBS-N is Wi-Fi CERTIFIED™ for full compliance with the 802.11n draft v2.0 standard, as well as the popular Wireless-G (802.11g) and Wireless-B (802.11b) standards. This next generation standard utilizes advanced MIMO (Multiple-In, Multiple-Out) technology to deliver incredible speed and range. With security being a key consideration, the latest WPA and WPA2 wireless encryption standards are supported, which prevent unauthorized access to wireless networks and ensure data is secure. Wireless security can also be set up easily using Wi-Fi Protected Setup™ (WPS) that enables push button or PIN configuration. To extend functionality further, the SMCWUSBS-N also supports Soft AP mode*. This enables it to function as a wireless Access Point so that associated clients can share an Internet connection, files, printers, and other network services. Finally the SMCWUSBS-N includes an easy installation wizard which guides you step-by-step through the install process. Once installed the WLAN utility allows you to scan for available wireless networks and manage multiple network profiles so connecting becomes instantaneous.
